Overview

autoAnalyzer™ Consultancy Kit delivers comprehensive real time network monitoring and troubleshooting.

Enterprise Network Management Today

A recent survey by Network Management Consortium revealed that a logical topology mapping function in management software "improved problem resolution by up to 40%."

Integrated visual mapping capabilities provides for an outstanding enterprise network management tool to be deployed on any infrastructure network.

On autoAnalyzer™ Consultancy Kit

autoAnalyzer™ Consultancy Kit is tailored to meet the high demands of service engineers and technicians improving operation efficiency.

It transforms network management from being a complex set of knowledge-dependent, frequently manual tasks into an efficient methodology, maximizing the usage of today's complex infrastructure networks.

Deployed with remote probe manager and probes, it enables remote management, beneficial to organizations in need of managing several remote locations.

autoAnalyzer™ Consultancy Kit provides both passive statistical and protocol analysis of monitored frames and active analysis using information obtained from SNMP browsing.

It also acts as an SNMP agent to enhance any existing SNMP Management system.

autoAnalyzer Consultancy Kit is created with the trademarks of the Codima Toolbox, easy-to-use, cost efficient and highly visual.

autoAnalyzer™ Consultancy Kit can be deployed as stand alone or with add on tools autoVoIP™, autoVoIP™ Consultancy Kit and autoAsset™.

Enterprise Network Management tool designed to take the complexity out of managing today's Networks and Infrastructures

Value Proposition

- ▶ autoAnalyzer™ Consultancy Kit delivers comprehensive real time networking, monitoring, and troubleshooting tool with visual mapping
- ▶ Tailored to meet the high demands of service engineers and technicians

Return On Investment

- ▶ Improved operation efficiency
- ▶ Greater business productivity
- ▶ Higher infrastructure accuracy

Key Features

- Comprehensive networking, monitoring, and troubleshooting tool with mapping
- Local passive monitoring
- Local active SNMP based management
- Remote Management of probes distributed in remote segments
- Reporting on network trends
- Troubleshooting using Expert System

Key Benefits

- Enhanced reporting capability on service levels
- Lower cost of operations
- Lower investment costs
- More efficient use of skilled staff

Key Functions

- Real-time MAP
- Extensive historical analysis
- Extensive real-time traffic analysis
- Alarms & events

Requirements

- Windows 2000, 2003 Server or XP with 2GHz CPU (minimum)
- 516Mb RAM (minimum)
- Monitor resolution of 1024 x 768 (minimum)

autoVoIP™

- Adds monitoring and troubleshooting for VoIP networks with easy to use One-Click Management™

autoVoIP™ Consultancy Kit

- Adds monitoring and analyzing with Flow, RTP and Path analyzer on up to 1000 phones, and is available for laptop PC

autoAsset™

- Add discovering and reporting for any software or hardware in any infrastructure
